

7. (Twice Amended) A deflection yoke according to claim [1] 22, [wherein the means for modifying the magnetic field are arranged]
further comprising a second metal plate wherein
said first and second metal plate extend on both of the saddle-shaped coils of the same pair, symmetrically with respect to the Z axis.

IN THE DRAWINGS

Amend FIGURES 2A and 2B, by adding in each the legend "PRIOR ART", as shown in the enclosed copy.
